Flexera Inventory Manager 9.2 Patch Q211574

Release Notes

15-March-2013

Introduction

FlexNet Manager Platform provides scalable software and hardware asset management across more than 12,000 publishers and 100,000 applications, providing insight into installed software and application usage while delivering purchased versus installed license reconciliation.

These release notes contain information about patch Q211574 for Flexera Inventory Manager 9.2, which is a part of FlexNet Manager Suite for Enterprises.

New knowledge base

At the time of the 8.5 release, Flexera Software transitioned to a new knowledge base for Flexera Inventory Manager. This is accessible from the [Flexera Software Product Support website](#).

The numbers of articles in the previous system are preserved, with an "M" prefix. For example, article 123456 becomes M123456 in the new knowledge base. New articles created in the new knowledge base have a "Q" prefix.

If you don't have access to the new knowledge base, please click to [request a login](#) and complete all the fields. You will then receive an email with your login details.

License Agreement

If your company has purchased a license and signed a software license agreement with Flexera Software or an authorized Flexera Software reseller, the terms and conditions of that agreement govern all use of this software. Otherwise, use of this software, on either an evaluation or a fully-paid license basis, is subject to the terms and conditions of the FlexNet Manager "click-through" End User License Agreement, which can be found on the installation CD image or in the downloaded installation package.

If you do not agree with the terms of the applicable software license agreement, you may not install onto any of your computers or, if already installed, you must remove from all computers on which it is installed. You must also return or destroy all copies of the software in your possession.

Installation and Upgrade Procedures

This patch is only installable on Flexera Inventory Manager release 9.2. Executing the install wizard on any other version will fail.

The first step for installing the patch is to extract the contents of the zip file linked to the Knowledge Base article [Q211574](#) on your Flexera Inventory Manager administration server and any inventory beacons you have installed.

Run the Inventory Server patch installation wizard for the patch (IS 9.2 Patch Q211574.exe) on your Flexera Inventory Manager administration server and the Inventory Beacon patch installation wizard (IB 9.2 Patch Q211574.exe) on any inventory beacons you have installed.

Resolved Issues

The following issues were resolved in patch Q211574 for the Flexera Inventory Manager 9.2 release:

Issue Number	Description
79421	Port numbers above 32768 can't be scanned

System Modifications Made

Inventory Server

Registry:

Key	Value
HKLM\Software\ManageSoft Corp\ManageSoft\Administrator\CurrentVersion\Q211574 Install Location	Original install folder of Inventory Server
HKLM\Software\ManageSoft Corp\ManageSoft\Administrator\CurrentVersion\Patch Version	Q211574

File System:

Directory	Files
C:\Program Files\ManageSoft\DotNet\bin	ManageSoft.Database.dll ManageSoft.Database.Impl.dll ManageSoft.Implementation.Configuring.ConfApi.dll ManageSoft.Import.dll
C:\Program Files\ManageSoft\RemoteExecution	DiscoverXenDesktop.ps1 mgsdisco.exe

Note: Directory specified is the default location for these files, your install location may vary.

Original copies of all files exist as backups with a ".Q211574.bak" suffix to the name.

Inventory Beacon

Registry:

Key	Value
HKLM\Software\ManageSoft Corp\ManageSoft\Administrator\CurrentVersion\Q211574 Install Location	Original install folder of Inventory Beacon
HKLM\Software\ManageSoft Corp\ManageSoft\Administrator\CurrentVersion\Patch Version	Q211574

File System:

Directory	Files
C:\Program Files\ManageSoft\DotNet\bin	ManageSoft.Compliance.Common.dll ManageSoft.Compliance.Data.API.dll ManageSoft.Compliance.Importer.Logic.dll ManageSoft.Compliance.Importer.Tracing.dll ManageSoft.Database.dll ManageSoft.Database.Impl.dll ManageSoft.Implementation.Configuring.ConfApi.dll ManageSoft.Import.dll
C:\Program	DiscoverXenDesktop.ps1

Directory	Files
Files\ManageSoft\RemoteExecution	mgsdisco.exe

Note: Directory specified is the default location for these files, your install location may vary.

Original copies of all files exist as backups with a ".Q211574.bak" suffix to the name.

ManageSoft.Import.dll is only updated if the web resolvers are installed on this Inventory Beacon.

Known Issues

A list of known issues for the Flexera Inventory Manager 9.2 release is available from the Flexera Software support site. Please refer to Knowledge Base article Q210696 for details.
